yocova

PRESS RELEASE

16th May 2023

Flightradar24 joins Yocova as a member of the Partnership Programme

[Flightradar24](#), the real-time aircraft tracking service has recently joined the Yocova Partner Programme.

The Swedish internet-based service shows real-time aircraft tracking, including origin, destination and flight numbers, together with positions, altitudes, speeds and more. The service is used by most major airlines around the world together with other industry giants including Airbus, Boeing, and Embraer. Flightradar24 is powered by the world's largest ADS-B, or automatic dependent surveillance-broadcast network, which enables aircrafts to be positioned and tracked. Using this global ADS-B network, the service tracks over 200,000 aircraft and is used by over four million users each day.

As a [Partner Member](#), Flightradar24 is already taking advantage of the Yocova platform, which enables the company to easily connect with aviation companies and professionals around the world. And they're making use of the [Yocova Marketplace](#), with a Web Business Subscription service now available to Yocova Members. The subscription enables access to Flightradar24 and the hundreds of features it includes, such as real time winds, AIRMETS/SIGMET, fleet data, flight playback, custom fleets, airport view and more. With the web business subscription licence available on Yocova, users can also benefit from accessing up to three years of aircraft history.

Flightradar24 comment:

We are excited to participate on the Yocova platform with its unique focus on aviation related businesses. Flightradar24 is the most popular flight tracking service in the world. Along with our proven high-quality data services. We are confident that fruitful connections will be made on the Yocova platform through the discussion groups, the marketplace, and the social platform for aviation professionals.

Yocova comment

"We're delighted that Flightradar24 has joined Yocova as a Partner, enabling them to augment their existing sales and marketing channels. As a trusted service provider to many airlines, aviation businesses and professionals across the globe and with their network capacity to track over 200,000 flights per day, we're thrilled to have them onboard. One of the key missions of Yocova is to connect the aviation community, so to have Flightradar24 join us with its incredible global reach, is truly fantastic."

About Yocova

Yocova (You Connect for Value) is an open, neutral digital platform and ecosystem for the aviation industry to collaborate, manage data, and access leading digital services from OEM partners and digital vendors.

It's an end-to-end platform for innovation: digital infrastructure and services to facilitate the exchange of ideas, data, and apps in aviation.

The platform is structured around the pillars of Community, Data Rooms, Marketplace, and Enterprise engagement:

- **Community:** the global aviation community on one open and trusted platform – connect and collaborate with aviation peers in public forums and private working groups

- **Data collaboration:** a decentralised, secure, and voluntary data API exchange giving you full control of who accesses your data to support your digital initiatives

- **Marketplace:** a trusted 'go to' aviation marketplace for digital transformation – find, try, buy, and deploy leading digital aviation apps, data API's solutions and services, or sell and manage your own through a global route-to-market

- **Enterprise engagement:** Yocova provides a single command and control platform through which to securely distribute, authenticate, and update all digital content across the customer community.

For OEM partners, Yocova provides a single command and control platform through which to securely distribute, authenticate, and update all digital content across the customer community. For OEM customers, a single entry-point for swift, efficient user access to all OEM digital content.

Yocova continues to pursue its growth strategy at pace with over 6,000 aviation professional members from across 425+ airlines and 840+ aviation enterprises extending across the aviation value chain, including but not limited to professionals and enterprises from airlines, business jet operators, digital/data vendors, through to airports, ANSPs and OEMs.

About Flightradar24

Flightradar24 is a global flight tracking online service based in Stockholm, Sweden. It started out as a hobby project back in 2006, when two self-confessed "Swedish aviation geeks" built a network of ADS-B receivers in Northern and Central Europe. In 2009, they opened up the network and made it possible for anyone with an ADS-B receiver to upload data to it, leading to coverage across much of the world. Flightradar24 continues to expand and improve its global coverage as new ADS-B contributors join via its FR24 receivers. The service, which started off as a small project, is now one of the world's leading aviation tracking services, trusted by major airlines and millions of users each day, including aviation professionals and enthusiasts. The Flightradar24 app, which has ranked number one in the AppStore in over 130 countries, has been downloaded more than 75 million times around the world.
