## Yocova partner QOCO Systems transforms data exchange and integration for aviation operators

**Aviadex.io, offered by QOCO Systems, serves as a solution that delivers data exchange and integration services for operators within the aviation industry.**

Yocova partner [QOCO Systems](#) has launched [Aviadex.io](#), a data exchange and integration service that can be used by all organisations across the aviation sector. Aviadex.io was developed to reduce delays and errors in the manual and point to point sharing of data, it also streamlines data exchange, enabling better collaboration and a reduction in manual data entry work. The solution was built and operated on years of system integration and data exchange expertise within the aviation industry and enables intelligent data exchange between collaborating parties.

As a Yocova partner, QOCO Systems takes advantage of the benefits of the platform and has listed Aviadex.io on the [Marketplace](#). Through the platform, QOCO can easily connect with relevant parties to which Aviadex.io was designed to benefit, including OEMs, engine MROs and lessors, airframe MROs to airlines and digital service providers.

For OEMs, Aviadex.io provides automated and regular data flow from the airline to the OEM and back. It enables OEMs to maintain an up-to-date and accurate digital model of all its assets, which feeds into financial forecasting, demand and maintenance forecasting, research and development, operational safety, and enhances the value-adding digital services it can provide. For MROs, Aviadex.io enables transfer of the full work package/off-log data from an airline to the MRO at the click-of-a-button, as well as real-time delivery of work completion records and defect reports back to the operator during the maintenance/repair. The electronic work package import not only reduces manual data entry work but enables linking the data to processes such as resource and material planning. For lessors, Aviadex.io makes it possible to, among other things, gain real-time data about engines under maintenance of lease agreements, which can vastly improve asset maximisation. For airlines and digital service providers, Aviadex.io makes it possible for the airline to link its maintenance and aviation system with other systems, enabling a range of process improvements, such as eLogbook integration and APU counter automation from Aircraft Communications Addressing and Reporting System (ACARS) data.

## About Yocova

Yocova (You Connect for Value) is an open, neutral digital platform and ecosystem for the aviation industry to collaborate, manage data, and access leading digital services from OEM partners and digital vendors.

It's an end-to-end platform for innovation: digital infrastructure and services to facilitate the exchange of ideas, data, and apps in aviation.

The platform is structured around the pillars of Community, Data Rooms, Marketplace, and Enterprise engagement:

- **Community:** the global aviation community on one open and trusted platform – connect and collaborate with aviation peers in public forums and private working groups
- **Data collaboration:** a decentralised, secure, and voluntary data API exchange giving you full control of who accesses your data to support your digital initiatives
- **Marketplace:** a trusted 'go to' aviation marketplace for digital transformation – find, try, buy, and deploy leading digital aviation apps, data API's solutions and services, or sell and manage your own through a global route-to-market
- **Enterprise engagement:** Yocova provides a single command and control platform through which to securely distribute, authenticate, and update all digital content across the customer community.

For OEM partners, Yocova provides a single command and control platform through which to securely distribute, authenticate, and update all digital content across the customer community. For OEM customers, a single entry-point for swift, efficient user access to all OEM digital content.

Yocova continues to pursue its growth strategy at pace with over 7,500+ aviation professional members from across 425+ airlines and 840+ aviation enterprises extending across the aviation value chain, including but not limited to professionals and enterprises from airlines, business jet operators, digital/data vendors, through to airports, ANSPs and OEMs.

## About QOCO Systems

QOCO Systems is an aviation IT service and software solutions provider based in Finland. Founded in 2009, the company has experienced significant growth since 2015 and continues to grow steadily. The team of experienced professionals at QOCO provides aviation-specific software solutions and consultancy services and between them have decades of experience of delivering international projects. QOCO's SaaS solutions serve to support operational efficiency and excellence in aviation, such as **MROTools.io** for streamlined tool management in aircraft maintenance, and **Aviadex.io** for data Exchange and Integration Service for all aviation industry operators. QOCO adopts a customer-centric approach to support the success of aviation businesses such as airlines, MROs, and aerospace OEMs. They are committed to achieving the highest level of quality and information security supported by OSI 9001 and ISO 27001 compliant management system certification.
